Re-imaging the Dell OptiPlex 7440 computer

Introduction
This topic describes how to re-image the Dell OptiPlex 7440 computer. Re-imaging will remove all software on the computer and re-install the factory default Microsoft® Windows® operating system. In the event that your computer fails or becomes corrupted, use these instructions to re-image it.

Before you begin
Be sure to back up data files and personal information before re-imaging the computer.

If applicable, make note of the network settings.

Re-imaging the computer

To re-image the computer:

1. Turn on the OptiPlex computer.
   
The system boots to the Windows boot manager. You have 30 seconds to select either Windows 7 or Recovery.

2. Select Recovery to re-image the computer.

   Note: If you do not make a selection within 30 seconds, the system will automatically boot to Windows 7.
The system begins executing a script to re-image the computer. The factory default image will be applied over the old corrupt image.

3. When the operation successfully completes, press any key to continue.

The computer restarts and is set back to the factory default settings with a new operating system.
